

LIFESPAN

INDIA'S LARGEST NUTRACEUTICAL MANUFACTURER

MESSAGE FROM CMD

Lifespan is a world-class manufacturer of Nutraceuticals, Herbal, Ayurvedic and Personal Care Products on a mission to educate and lead the society towards a healthier lifestyle. Good health must be the ultimate goal of everyone's life. We help people reach this goal by manufacturing products focused on fulfilling their nutritional needs. Our teams comprise of scientists, quality assurance, quality control and regulatory experts who deliver consistently so that Lifespan can be a leader in the Nutraceutical industry.

Our state-of-the-art facility and labs at Lifespan are dedicated to innovation in products, services and methodologies and nurture the development of unique products. Our scientific team is knowledgeable, innovative and is one of the main reasons we are able to differentiate ourselves from other manufacturers.

We strive to exceed the expectations of our customers by consistently providing them with high-quality health and nutrition products along with an excellent customer service.

Thank you for your interest in Lifespan.

INTRODUCTION

Lifespan is one of India's largest manufacturers of Nutraceuticals, Natural, Herbal, Ayurvedic and Personal care products. We have a dedicated Research and Development division, where creative minds are unleashed. Stringent quality and assurance standards are put in place as a part of all our manufacturing processes. Our manufacturing facility is built on USFDA standards and we are certified by cGMP.

Manufacturing:

Lifespan's manufacturing facilities are sophisticated and we strive to keep them updated through continuous improvement of processes and infrastructure. The manufacturing facility is equipped with state-of-the-art machinery and our scientists and technicians are experts in running the production without compromising on quality.

WHAT SETS US APART

- World class manufacturing facility.
- Dedicated Research and Development division.
- Qualified and experienced staff.
- Dedicated QA team.
- Cutting edge manufacturing technology.
- Formulation and product development.
- Innovative team of scientists.
- Excellent customer service.

RESEARCH AND DEVELOPMENT

Lifespan's strength lies in its ability to innovate through focused research and development. Our laboratories are equipped with a complete range of sophisticated analytical instrumentation including HPLC, GC, UV, ICP-OES, GC FID & ECD, Fully automatic leak test apparatus, Bursting strength apparatus, Halogen moisture meter, Brookfield viscometer and automatic hardness tester. We also have a facility for micro biology testing, for detecting pesticides, and other contaminations in raw materials, packaging materials and finished goods. Our teams of scientists are specialized in product formulations, design and analytical developments. Our labs are places where discoveries are transformed into high quality therapeutic products. We maintain the quality through rigorous quality checks at every step of production.

Key caveats in R&D:

Idea to Market :

Lifespan offers its clients a one-stop-shop for all their needs. We have the capability to go rapidly from idea to market and all the intermediary steps involved. Our scientists from Product Development and Design (PDP) emphasize on continuous improvement of processes involved in commercial manufacturing.

Pre-formulation studies:

Lifespan has a proven expertise in conducting

pre formulation studies to assess the synergy of a proposed product. Proof of concept, IP creation, finalizing commercial product design and format, stability, nutritional justification and safety are the various aspects we are good at.

Formulation development:

Formulation development is a pivotal step in the process of new product development. It involves identification of right ingredients, establishing specifications, process optimization, and analysis and lab trials.

Pilot batches and pivotal stability:

Once the formulation is optimized at lab level, process and quality parameters are set at the product level. Process validation is conducted at pilot scale and Pivotal Stability Batches are produced. A detailed stability study program is conducted as per ICH guidelines.

Pre-clinical and clinical studies:

Pre clinical and clinical studies of nutritional and health supplements is gaining a lot of attention nowadays. FSSAI mandates the submission of safety, toxicity and efficacy data for novel and proprietary formulations before the product is approved. Lifespan is involved in protocol preparation and review, and monitoring of the clinical study.

Capsules : We manufacture many different kinds of capsules using natural active ingredients in our manufacturing facility. All our packaging needs are met in-house and our lines are equipped with sensors that can detect metal. We also provide our customers with contract manufacturing for world class healthcare products.

NO	CAPSULES
1.	Joint care capsules with Glucosamine, Chondroitin, MSM & Hadjod
2.	Spirulina Capsules fortified with iron
3.	Multivitamin+Multimineral Capsules
4.	Green Coffee Bean Capsules with Vitamin A, D2, E & K
5.	Garcinia Capsules with Garlic, Irvingia & Tamarindus for weight Management.
6.	Moringa capsules with added Vitamin K
7.	Smart Eye LDC with Lutein and zeaxanthin
8.	Prebiotic & Probiotic with Isabghol, Chicory & Lactobacillus
9.	Diabetes Management Capsules with pure Methi seed extract
10.	Aphrodisiac Capsules with 7 unique herbs
11.	Capsules for Piles relief, rectal care
12.	Herbal based Capsules for early fracture recovery
13.	Fat draining Capsules for elimination of fat from body
14.	Herbal capsules for better hair
15.	70 natural MINERAL CAPSULES
16.	Silymarin Capsules for liver health
17.	Coleus capsules
18.	Karela capsules
19.	Jamun capsules
20.	Haridra capsules

NO	CAPSULES
21.	Garlic capsules
22.	Guggulu capsules
23.	Triphala capsules

Nutrition For Children & Women:

Young children need to develop healthy eating and physical activity habits early on. They grow quickly and change physically, mentally and socially. They need healthy food to meet their growth and developmental needs. Due to many reasons children have diets that do not meet the adequate nutrition needs. Women's bodies go through a lot of changes during pregnancy, childbirth and menopause. These biological phenomena take their toll on the body, and it is important that women have all vital nutrients to help build their immune system. The need for supplemental nutrition arises. Supplemental nutrition takes care of the deficiencies that are not provided by their diets.

Lifespan has the capability to manufacture the following products especially for children & women:

No.	Nutrition for Children	No.	Nutrition for Women

8.	Multi Nutritional Powder	8.	Raspberry Ketone Capsules
		9.	Conjugated Linoleic Acid Capsules
		10.	Slim-meal-replacement Shake

Hemp Products

The industrial hemp plant is a boon to mankind. Every part of the hemp plant can be used to manufacture different products. At Lifespan, we manufacture natural hemp based personal care products and food products with hemp seeds and their oil. Hemp seed oil contains protein, essential fatty acids, vitamins A, E, C and many other nutrients. When consumed as food, the essential fatty acids provide a plethora of benefits to the human body. Omega 3, 6, and 9 are essential for good heart health. When used topically, the omega-6 fatty acids that hemp oil contains is gamma-linolenic acid, which acts as a powerful anti-inflammatory while encouraging skin growth and new cell generation.

Hemp based Personal Care products:

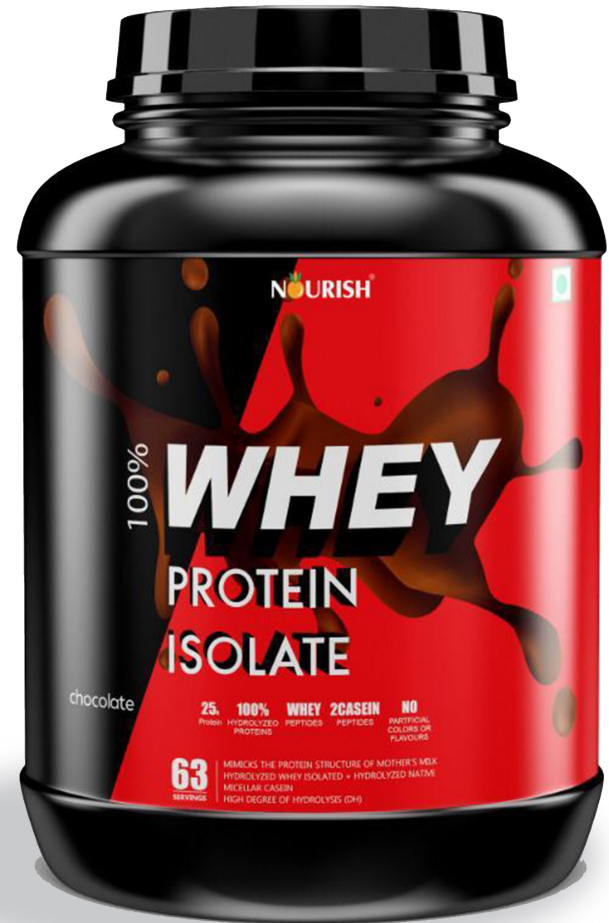

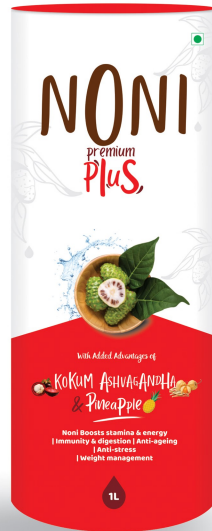

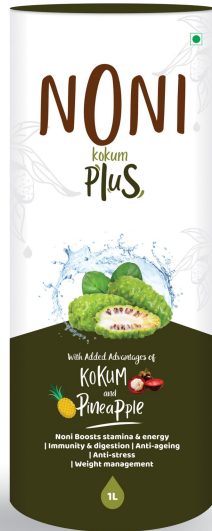

No.	Hemp Personal Care Products
1.	Body Lotion (Cream/Spray)
